Work experience

Dyeus/Myriad

April 2021 - Present

Mid-Senior fullstack and blockchain developer

Remote

- Created web front for various e-commerce and web3 based platforms in Vue.js and React
- Built several REST and GraphQL APIs using Prisma with SQL/NoSQL database
- Worked on a number of DEXes and wrote an ICO smart contract from scratch in Solidity
- Optimized some very resource and network intensive frontend projects
- Written several scripts for blockchain events analytics in Typescript/Javascript

LM Softech

Feb 2021 - April 2021

DotNet Intern

Bareilly, UP

- Worked as fullstack .NET intern on some client projects

Education

Master's degree

RBMI, Bareilly

Master of computer applications

2021 - 2023 (expected)

Final project: Work in progress...

Bachelor's degree

RBMI, Bareilly

Bachelor of computer applications

2018 - 2021

Final project: An online marketplace that allows sale & purchase of used items, built with Next.js, TailwindCSS & MongoDB - Firozi_{Src}

O Level

NIELIT, India

Web Technologies & C language

May 2019

Mini projects

Mars IT

A fairly normal looking website but with nearly 70% of it's content replaceable through provided admin panel, powered by Nuxt & Firebase

Gist_{Src}

Simple notepad that allows sending url encoded messages eliminating need of any intermediary server, can also persist data on user's local storage if needed, built with Vue.js & TailwindCSS

Game of life_{Src}

My attempt to clone the popular zero player game by John Conway, allows canvas resizing by zooming in & out of browser window

Firozi_{Src}

An online marketplace that allows sale & purchase of used items, built with Next.js & MongoDB. Has support for multiple authentication providers like Github, LinkedIn, Google etc. powered by Firebase authentication

Technical skills
